MAKING LEGAL COPIES OF DISKS

The disks included in this package are Archival disks. Follow the instructions below for either using the Archival disks for previewing the program or for making Legal Copies once you have purchased the program.

For a complete description of your rights and responsibilities in copying disks and using the program, see the Scholastic Software License and Limited Warranty Agreement included in the package.

The disks in this package are fully protected by copyright law. It is against the law to copy or in any way duplicate the disks or any portion of the program except under the terms expressly stated in these instructions and in Scholastic's Software License and Limited Warranty Agreement.

If You Are Previewing the Program

If you are previewing the package, use the Archival disks to run the program. You are not permitted to make copies of the Archival disks during the preview period—with the exception noted below.

IMPORTANT: The 5.25-inch Archival disks are write-protected to prevent damage or changes to their contents. Because the 5.25-inch Archival disks are write-protected, you may encounter problems when you preview programs that write printer settings or other information to the program disk. These programs will usually identify the problem as a "write protect error." If you are previewing a program and encounter this problem, you are permitted (despite the restrictions stated in Section 3 of the Software License and Limited Warranty Agreement for Non-copy Protected Software Published by Scholastic Inc.) to make a temporary Legal Copy of the 5.25-inch program disk for use during the preview period. Do not *affix the Legal Copy label included in your package to this temporary copy. At the end of the 30-day preview period, you must erase all temporary Legal Copies.*

Once You Have Purchased the Program

Once you have purchased the package, you must make a Legal Copy of each Archival disk. You may not use the Archival disks for running the program. Use the Legal Copies instead.

To make Legal Copies of the Archival disks, follow these instructions:

1. Use any standard copy program or function to copy the entire contents of each Archival disk onto one blank disk. If you are copying the Apple version of the program, use the Duplicate Disk function of your ProDOS® System Disk or a commercial disk copying program. If you are copying the MS-DOS® version of the program, use the DOS DISKCOPY command or a commercial disk copying program.

ISBN: 0-590-82211-X

NOTE: Be sure to copy the complete contents of each disk. If the label on the Archival disk indicates that it is double-sided, be sure to copy both sides. Do not change any directory or file names. If the program indicates that there is a "write-protect" error, the blank disk that you are using is either not notched on the side that you are copying to, or there is a write-protect tab covering the notch. To continue, you must either notch the disk or remove the write-protect tab from the existing notch.

2. Your package includes Legal Copy disk labels. Use a soft-tipped marker to write the serial number from the enclosed Software License and Limited Warranty Agreement in the space provided on each disk label.
3. Affix the appropriate Legal Copy label to each of the copies that you created in Step 1.
4. Store the Archival Disks in a safe place with a copy of the Software License and Limited Warranty Agreement.

If a Legal Copy becomes damaged or defective, first try recopying the program from the Archival disk to the Legal Copy disk. If the program still does not work, the Legal Copy disk medium itself may be defective. In this case, copy the program from the Archival disk to another disk as a temporary legal copy. Then send the defective Legal Copy disk to Scholastic at the address below for a free replacement. When you receive the replacement, erase the temporary legal copy that you made.

If an Archival disk is damaged or defective, send it to Scholastic at the following address for a free replacement:
